Art Unit: 1614

The status of serial no. 09/214,267 should be inserted on page 1 of the specification.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d.2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 30-32 of U.S. Patent No. 6,391,874 B 1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims directed to treating cancer would read as the prior art claims directed a subject suffering from "a disorder medicated by aberrant protein kinase activity". Applicants state on page 7, lines 4-6 that the invention also includes compounds which are highly active against both C-erb B-2 and E G F-R receptor kinase hence allowing treatment of a broader range of tumors". Patent claim 2, is drawn to two kinases, i.e. C-erb B-2 and EGF-R. Clearly this would read on treating cancer.
